

For Immediate Release:

**Dover Saddlery and Kilawatt Technologies Sign Agreement to
Cut Energy, Lower Greenhouse Gases in Equestrian Company's Facility**

Shelburne, VT-August 7, 2008- Kilawatt Technologies is pleased to announce that the information software company has signed an agreement with Dover Saddlery, Inc. to reduce energy and lower greenhouse gases in the company's Littleton, Massachusetts facility. Over the coming months, Kilawatt Technologies will work with Dover Saddlery to recognize opportunities to cut energy consumption and demand, lower energy costs and reduce greenhouse gases in the company's 100,000 square foot warehouse facility.

One area Kilawatt Technologies will focus on is enhancing the energy efficiency of the company's lighting system. Dover Saddlery will also be utilizing Kilawatt Technologies' eEnergyAssess product that establishes valuable baselines and tracks monthly energy use, cost savings and greenhouse gases reductions. Developing these energy and environmental baselines and then measuring monthly results is an important first step for an organization interested in effectively managing energy consumption, as well as, documenting greenhouse gas savings, lowering your carbon footprint, or applying for LEED certification of an existing building.

Dover Saddlery, Inc. is the leading multichannel retailer of equestrian products in the United States.

Founded in 1975 in Wellesley, Massachusetts, by United States Equestrian team members, Dover offers a

broad and distinctive selection of competitively priced, brand-name products for horse and rider through catalogs, the Internet and company-owned retail stores.

Founded in 2000, Kilawatt Technologies is a leading information software company helping organizations conserve energy, lower costs and reduce greenhouse gases in large commercial buildings with little or no capital investment.
