

For Immediate Release:

Florida Public Utilities Company Taps Kilawatt Technologies
Shelburne company helps with conservation program

Shelburne, VT-June 4, 2008- Florida Public Utilities Company, headquartered in West Palm Beach, Florida recently approached Kilawatt Technologies concerning one of their customers, a large industrial facility with an annual \$2M electricity bill. Utilizing Kilawatt's eEnergyAssess, the utility was able to assist their customer in analyzing their energy consumption, costs and environmental impact. eEnergyAssess is an independent, audit-grade analysis of energy costs, use and demand, an organization's unique utility rates, greenhouse gases and a two year future baseline of expected energy use.

Kilawatt Technologies eEnergyAssess is based on the company's innovative EnerSuite software and is a critical first step for any business serious about implementing, impactful energy and environmental initiatives. In addition to the detailed energy analysis, eEnergyAssess also provides helpful tips and strategies on cutting costly energy consumption and reducing greenhouse gases.

Florida Public Utilities Company was established in 1924 and provides energy services to communities in growing markets throughout Florida. The company has over 94,000 customers providing electric service, natural gas and propane gas in these communities.

Kilawatt Technologies is a leading information software company helping organizations around the world conserve energy, lower costs and reduce greenhouse gases in large commercial and industrial buildings with little or no capital investment.
