

Kilowatt Technologies

**Profitable Energy Strategies
For Your Business**

CREATING SMART ENERGY SOLUTIONS TODAY FOR A GREEN TOMORROW

DO YOU NEED AN AFFORDABLE STRATEGY TO COMBAT RISING ENERGY COSTS?

Restraining energy costs in today's world of tight budgets and limited resources is one of the greatest challenges facing businesses. Managing your buildings' energy systems in the face of yearly rate increases is extremely cost effective because your savings go right to the bottom line.

One solution is partnering with Kilowatt Technologies. Kilowatt Technologies has created innovative intellectual property and software called EnerSuite™ and can develop a proactive energy reduction strategy that will save over 20% annually of your building's energy costs, saving tens of thousands of dollars each year.

KILAWATT TECHNOLOGIES ELIMINATES THE FINANCIAL AND TECHNICAL ROADBLOCKS TO LOWERING COSTS AND GREENHOUSE GAS EMISSIONS.

WHAT'S PREVENTING YOU?

Contrary to common belief, it is not necessary to spend a lot of money to reduce energy costs in your buildings. By understanding how, when and where energy waste occurs, Kilowatt Technologies is able to provide strategies with short-term paybacks for reducing energy consumption. Kilowatt Technologies innovative technology optimizes systems and no capital investment is necessary to start your company's energy initiative.

"We substantially lowered our energy costs and the savings went right to the bottom line. I don't know why we didn't do this sooner!"

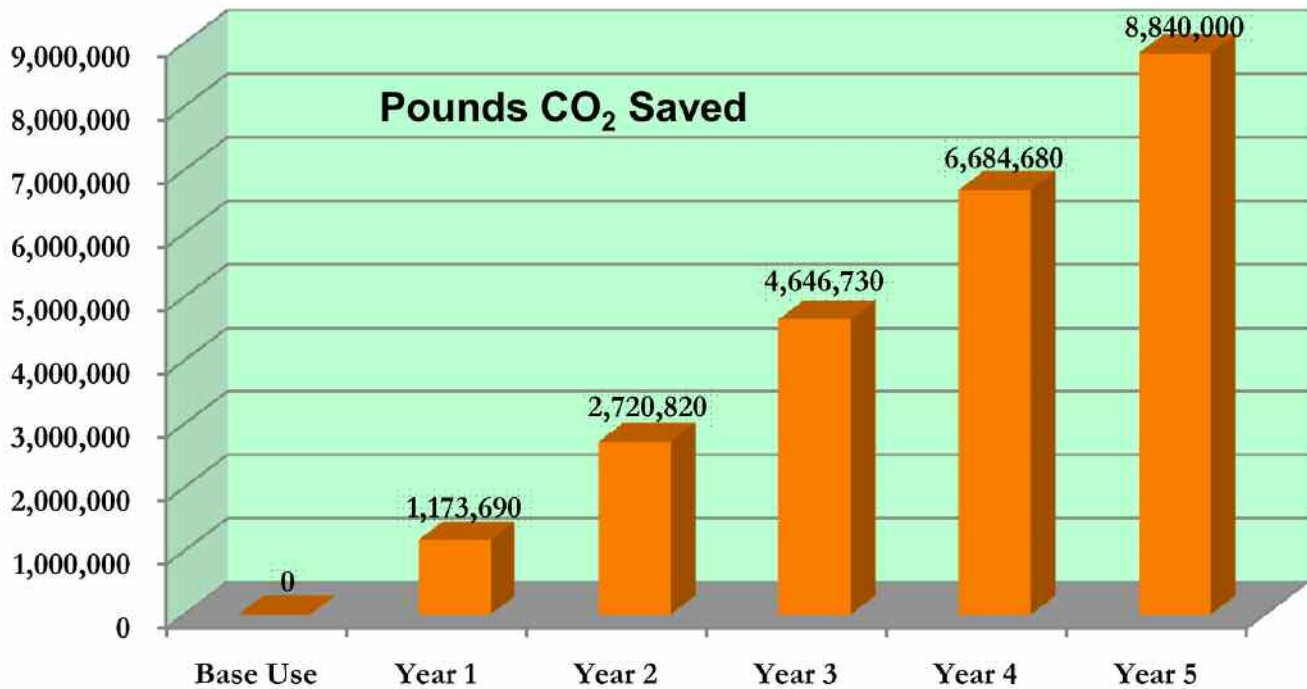

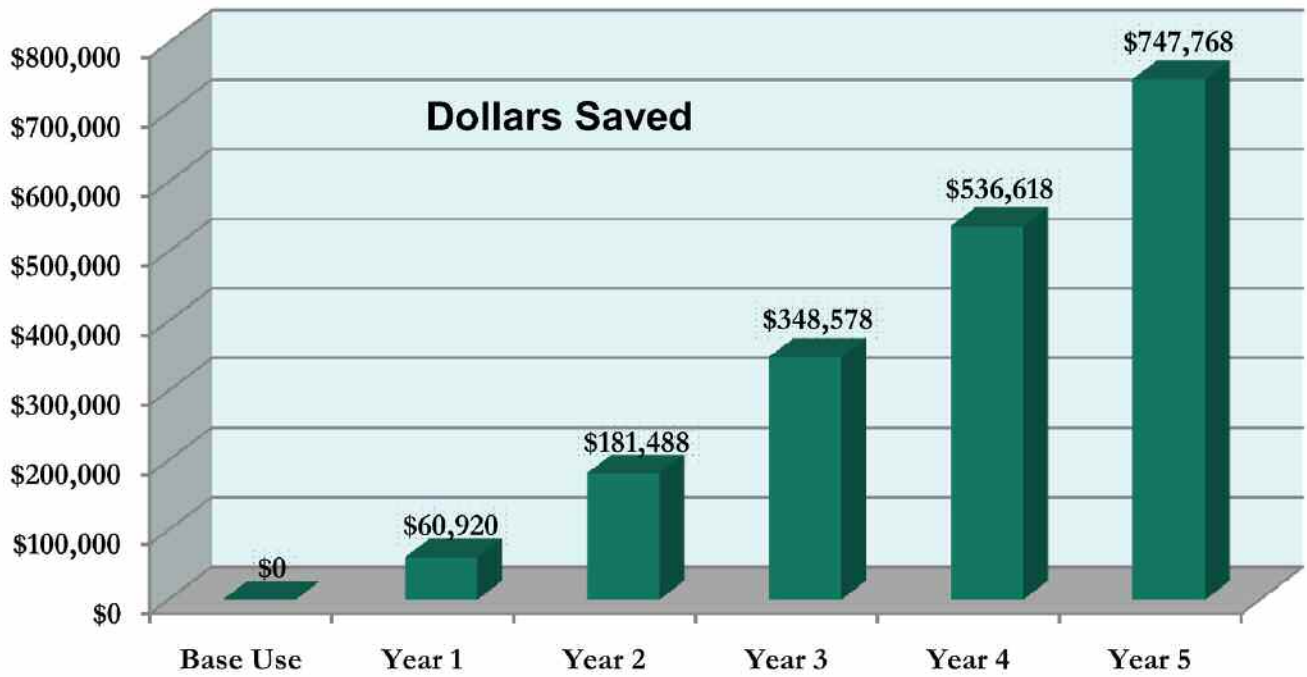

WHAT TECHNOLOGY DOES KILAWATT BRING TO YOU?

Kilowatt Technologies has designed and developed state-of-the-art energy conservation software that is integrated with advanced diagnostic equipment. Our system quickly and accurately locates costly building issues and problems that we help you correct. This proprietary technology, EnerSuite™, is available only to you when you partner with Kilowatt Technologies. Kilowatt Technologies is one of a few national companies focusing on cutting costs and reducing energy demand by utilizing advanced diagnostic technology.

ESTIMATED CUMULATIVE SAVING REDUCTION FOR A BUSINESS WITH ANNUAL ENERGY COSTS OF \$500,000

HOW KILAWATT TECHNOLOGIES HELPS YOU:

- Lower your company's energy expenses, ease budget concerns and pressures.
- Valuable costs savings goes right to your companies' bottom line.
- Dramatically lower and document actual greenhouse gas emissions reductions.
- Gain valuable public good will, exposure and green benefits from your reduced energy "footprint".

REDUCING GREENHOUSE GASES IS PROFITABLE TOO!

In today's world, being responsible environmental stewards is valuable for your business too. Kilawatt Technologies significantly lowers the amount of harmful greenhouse gases released by your buildings, usually 22% or higher. Some customers meet current Kyoto Protocol standards in a matter of months. We lower your environmental impact and document actual savings for your good will efforts. Kilawatt Technologies provides practical, successful solutions that support your company's valuable global warming initiatives.

OUR ONLY BUSINESS IS MAKING YOU PROFITABLE AND GREEN

Kilawatt Technologies doesn't sell equipment or energy and offers a number of easy, convenient payment options to help you begin your project. Regardless of which option you take advantage of, we save you over 20% annually. Our payback periods are short, usually a few months instead of the 5-15 years typically offered by other companies. Kilawatt Technologies has extensive experience, knowledge and demonstrated results.
