Cost Effective Strategies for State,
Local and Federal Government

CREATING SMART ENERGY SOLUTIONS TODAY FOR A GREEN TOMORROW

DO YOU NEED AN AFFORDABLE STRATEGY TO COMBAT RISING ENERGY COSTS AND LOWER GREENHOUSE GASES?

Restraining energy costs in today's world of tight budgets and limited resources is one of the greatest challenges facing cities and towns. Managing energy systems in municipal buildings, your town hall, city library or local schools is vital to maximizing taxpayer resources and responsibly protecting the environment.

One solution is partnering with Kilawatt Technologies. Kilawatt Technologies has the knowledge, experience and innovative intellectual property to develop a proactive energy reduction strategy that will save 20% annually of your buildings' energy costs, saving tens of thousands of dollars each year. Kilawatt Technologies' program also significantly reduces and documents the amount of harmful greenhouse gases released, dramatically lowering your community's impact and carbon footprint.

KILAWATT TECHNOLOGIES ELIMINATES THE FINANCIAL AND TECHNICAL ROADBLOCKS TO LOWER ENERGY COSTS. WHAT'S PREVENTING YOU?

Contrary to common belief, it is not necessary to spend a lot of money to reduce energy costs and greenhouse gas emissions from your buildings. With Kilawatt Technologies, no capital investment is necessary to start your green buildings energy initiative. Kilawatt's innovative technology simplifies the task of optimizing systems to cut harmful greenhouse gases. We report actual savings, so you receive full credit for your efforts.

Using Kilawatt Technologies allows your municipality to make a positive, proactive difference right in your community in fighting global warming and lowering energy costs.

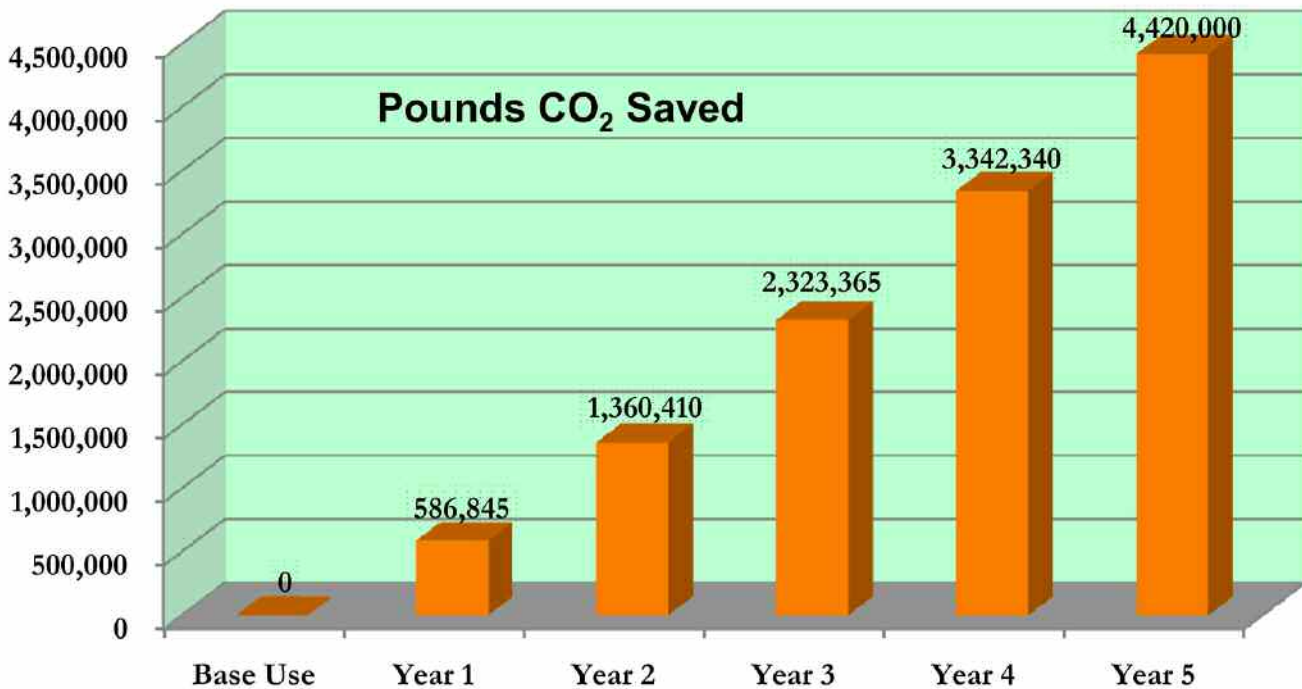

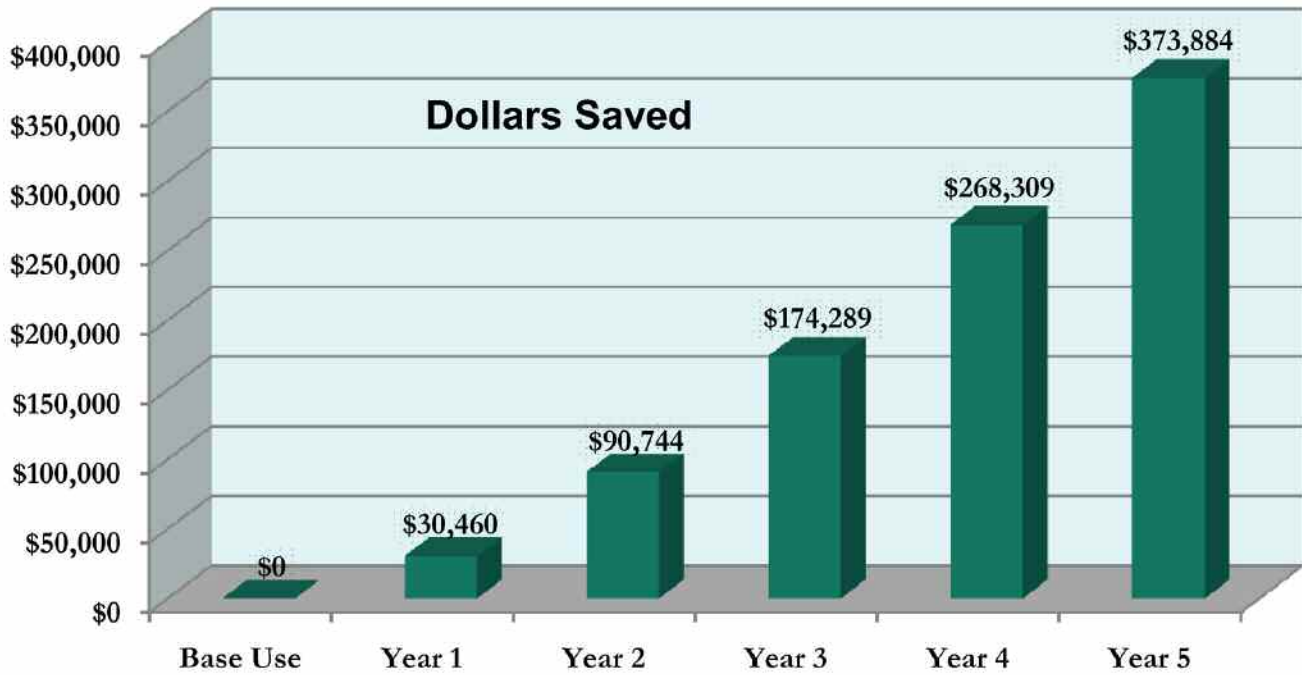

"Everyone wins with Kilawatt Technologies: the taxpayers, our programs and the environment."

WHAT TECHNOLOGY DOES KILAWATT BRING TO YOU?

Kilawatt Technologies has designed and developed state-of-the-art energy conservation software that is integrated with advanced diagnostic equipment. Our system quickly and accurately locates costly building issues and problems that we help you correct. This proprietary technology, EnerSuite™, is available only to you when you partner with Kilawatt Technologies to implement a green buildings energy reduction initiative.

TYPICAL CUMULATIVE FIVE-YEAR SAVINGS FOR A MUNICIPALITY WITH ANNUAL ENERGY COSTS OF \$250,000

HOW KILAWATT TECHNOLOGIES HELPS YOU:

- Lower your municipality's energy expenses, ease budget concerns and pressures.
- Apply valuable energy savings to fund other crucial programs, local schools, parks, recreation, and public libraries.
- Dramatically reduce and document greenhouse gas emissions.
- Gain valuable public good will, exposure and green benefits from your reduced energy "footprint."

WORKING TOGETHER TO SAVE ENERGY!

Kilawatt Technologies doesn't sell equipment or energy and offers a number of easy, convenient payment options to help your city or town begin your project. Regardless of which option you take advantage of, we still save you over 20% annually. Our payback periods are short, usually a few months instead of the 5-15 years typically offered by other companies. Kilawatt Technologies has extensive experience, knowledge and demonstrated results.
